

ASHUTOSH SALUNKE

Senior ServiceNow Developer

Pune, India | +91-8087402991 | ashutoshsalunke@proton.me | linkedin.com/in/ashutoshasalunke

PROFESSIONAL SUMMARY

ServiceNow professional with 7+ years of overall IT experience, including 5+ years focused on ServiceNow administration and development and 2+ years in quality assurance. Comfortable owning ITSM, CMDB, and Discovery configurations end-to-end, with hands-on scripting across Business Rules, Script Includes, Client Scripts, and Flow Designer. Experienced in leading REST and LDAP integrations, platform migrations, and Service Catalog design, while working closely with stakeholders to translate business needs into reliable, well-governed platform solutions.

TECHNICAL SKILLS

- **ServiceNow Modules:** ITSM, ITOM (CMDB, Discovery), Service Catalog, Employee Service Portal, Integrations
- **Development & Scripting:** Business Rules, Script Includes, Client Scripts, UI Policies, UI Actions, GlideAjax, JavaScript
- **Integration & Automation:** Flow Designer, Integration Hub, REST APIs
- **CMDB & Discovery:** CI Class Management, CMDB Governance, Discovery Definitions & Scheduling, MID Server Setup & Troubleshooting, vCenter Integration
- **Service Catalog & Portal:** Catalog Items, Record Producers, Order Guides, Approval Workflows, Portal Branding & Taxonomy
- **Platform Administration:** Update Sets, Instance Configuration, Application Development, System Localization

PROFESSIONAL EXPERIENCE

Senior Software Engineer – ServiceNow Developer

July 2023 – Present

Tech Mahindra, Pune

- Engineer and maintain core ITSM modules – Incident, Problem, Change, Service Catalog, and Request Management – aligning configurations with ITIL best practices.
- Build custom platform solutions using Business Rules, Script Includes, Client Scripts, UI Policies, and GlideAjax to extend out-of-the-box functionality.
- Architect and maintain REST API and LDAP integrations with external systems to support reliable data exchange.
- Lead CMDB governance and Discovery administration, including CI class design, MID Server configuration, and data quality improvement.
- Configured and scheduled horizontal Discovery across network segments, proactively troubleshooting MID Server connectivity, credentials, and payload errors to ensure accurate CI updates.
- Developed and refined custom Discovery patterns using Pattern Designer to accurately identify, classify, and map non-standard infrastructure components into the CMDB.
- Configure identity and access integrations, including SSO, LDAP user import, and the JAMF Connector, to support platform security and asset accuracy.
- Lead platform migration activities from BMC Remedy to ServiceNow Zurich, driving data transition and process alignment.
- Enhance the Employee Service Portal, delivering catalog, branding, and user experience improvements.

Software Engineer – ServiceNow Administrator & Dev

March 2021 – July 2023

Tech Mahindra, Pune

- Supported Major Incident Management and contributed to change approval and system localization processes.
- Administered and supported core ITSM modules, including Incident, Problem, Change, and Service Request Management.
- Built and configured catalog items, record producers, approval workflows, notifications, and SLA definitions to support business processes.
- Configured Client Scripts, UI Policies, Business Rules, UI Actions, and form layouts to meet evolving business requirements.
- Delivered Employee Service Portal enhancements, including catalog updates, portal configuration, and content maintenance.
- Managed user accounts, groups, roles, and access control configurations to help maintain platform security.
- Configured forms, lists, and workspaces in Service Operations Workspace, implementing enhancements aligned to business needs.
- Carried out update set deployments, instance configurations, patch testing, and release activities, supporting smooth production operations.
- Partnered with business users to gather requirements and translate them into platform configuration changes.

Software Test Engineer (QA Engineer)

January 2019 – March 2021

Tech Mahindra, Pune

- Carried out manual and automated testing for a healthcare web application built for a US-based client.
- Worked on web-based enterprise applications, supporting quality across multiple business-critical modules.
- Designed and executed test cases, test plans, and regression test scenarios covering critical business workflows.

KEY PROJECTS

BMC Remedy to ServiceNow Zurich Migration | *Platform Migration – ITSM Modernization*

- Connected both platforms and led migration of foundation data using LDAP, then configured groups, managers, and approval structures.
- Migrated Incident, Problem, Change, and Request Management processes, helping ensure continuity of service operations.
- Defined CMDB data sources and integrations, including mailbox intake, and prepared LDAP test readiness ahead of go-live.
- Helped consolidate legacy workflows into a unified ServiceNow platform, improving process consistency and reducing tool sprawl.

CMDB Governance & Discovery Implementation | *CMDB Health – Configuration Management*

- Designed custom CI classes and relationship mappings to represent infrastructure and application dependencies accurately.
- Set up Discovery definitions and schedules in the test environment, configured MID Servers, and resolved discovery-related issues.
- Configured the vCenter to ServiceNow integration to support accurate, up-to-date CI data.
- Drove CMDB governance and data quality initiatives, improving the accuracy and health of the configuration database.

Service Catalog & End-to-End Approvals | *Process Automation – Flow Designer*

- Designed service catalog items, record producers, and order guides to support structured, self-service request intake.
- Built end-to-end, multi-level approval workflows in Flow Designer, automating routing, notifications, and fulfillment tasks.
- Reduced manual processing effort and improved turnaround time for catalog-based requests.

Employee Service Portal Enhancement | *Employee Experience – Service Catalog*

- Redesigned portal taxonomy and catalog structure to help employees locate and submit requests more intuitively.
- Delivered custom branding and UX improvements, elevating the overall look, feel, and usability of the self-service experience.
- Streamlined catalog navigation to reduce misrouted requests and improve self-service adoption.

EDUCATION

Bachelor of Science (Computer Science)

2018

Dr. D.Y. Patil ACS College, Pimpri, Pune – Savitribai Phule Pune University

CERTIFICATIONS

- **ServiceNow Micro-Certifications:** Now Assist for Creator, AI Agents, UI Builder, Platform Analytics, Flow Designer, Integration Hub
- **ServiceNow Delivery Accreditations:** Agentic AI Implementation and Now Assist Implementation
